

Corrosion Protection Products

Introduction to Resimac

Resimac Corrosion Protection products are ideal for protecting metallic and concrete surfaces from weathering and UV degradation. Our product range covers a wide range of materials including water based flexible membranes, solvent based epoxy and polyurethane coatings and high build solvent free epoxy base coats.

Resimac products are manufactured in the UK and exported to over 40 countries worldwide, we are able provide local solutions in North America, South America, Africa, Europe, Middle East and Asia using our approved contractor network.

Resimac Corrosion Protection products are used in many industries and through our extensive worldwide network of contractors we are able to offer onsite technical support, training, presentations & seminars backed by project method statements & specifications.

Resimac Corrosion Protection Product Range

Concrete Primer		Resichem 503 SPEP		Solvent Free Epoxy	
Low viscosity solvent free epoxy primer for concrete and cementitious surfaces	Apply at 100-150 microns per coat	Mechanically prepared or scarified surfaces	Usable life 25-30 mins	Clear	
	Brush, roller or standard airless spray applied	Apply to surfaces with 8% or less moisture content	Minimum over coating 6 hours		
			Maximum over coating 24 hours		

Damp Concrete Primer		Resichem 505 Damp Seal		Solvent Free Epoxy	
Low viscosity solvent free epoxy primer for damp concrete and cementitious surfaces	Apply at 100-150 microns per coat	Mechanically prepared or scarified surfaces	Usable life 45 mins	Amber	
	Brush, roller or standard airless spray applied	Apply to surfaces with 25% or less moisture content	Minimum over coating 8 hours		
			Maximum over coating 24 hours		

Base Coat for Steel or Concrete		Resichem 501 CRSG		Solvent Free Epoxy	
High build solvent free epoxy coating for steel or primed concrete surfaces	Apply at 250-350 microns per coat	Mechanical surface preparation ST2/ ST3	Usable life 20-25 mins	Light grey	
	Brush, roller or standard airless spray applied	Abrasive blast cleaning surface preparation ISO 8501/4 Standard SA2.5 (SSPC SP10/ NACE 2)	Minimum over coating 6 hours	Dark grey	
			Maximum over coating 36 hours	Blue	

Base Coat for Steel or Concrete		Resichem 506 Aluprime		Solvent Based Epoxy	
Thin film solvent based epoxy coating for steel or metallic surfaces	Apply at 100 microns per coat	Manually or Mechanical surface preparation ST2/ ST3	Usable life 2 hours	Mid grey	
	Brush, roller or standard airless spray applied	Hydroblasting NACE WJ4— WJ3	Minimum over coating 8 hours		
			Maximum over coating 36 hours		

Base Coat Hot Steel Surfaces		Resichem 530 HA100		Solvent Free Epoxy	
Single component heat activated epoxy novolac coating for application to hot process surfaces 100°C—240°C	Apply in multiple coats at 75-125 microns per coat	Manually prepared surfaces using hand tools	Touch Dry	Red	
	Brush, roller or standard airless spray applied	Mechanical surface preparation ST2/ ST3	100°C 50 mins		
			120°C 25 mins		
		Hydroblasting NACE WJ4— WJ3	140°C 7 mins		
			160°C 90 secs		
			180°C 45 secs		

UV Stable Top Coat		Resichem 508 UVPU		Solvent Based PU	
Low viscosity solvent based polyurethane top coat with excellent UV stability	Apply at 75-125 microns per coat	Apply to surfaces primed using Resichem 503 SPEP, 505 Damp Seal, 501 CRSG or 506 Aluprime	Usable life 2 hours	Any RAL or BS colour	
	Brush, roller or standard airless spray applied		Minimum over coating 1.5 hours		
			Maximum over coating 36 hours		

UV Stable Top Coat		Resichem 554 RB Membrane		Solvent Based Acrylic	
Single component solvent based rubberised acrylic top coat capable of curing at temperatures as low as 5°C	Apply at 1mm per coat	Apply to directly to manually or mechanical prepared surfaces	Shower Resistant 15 mins	Light grey	
	Brush or roller applied	Apply to surfaces primed with 501 CRSG or 506 Aluprime	Touch Dry 1-2 hours	Dark grey	
				White	

UV Stable Top Coat		Resichem 555 Resinox		Water Based Acrylic	
Single component water based acrylic membrane with excellent elongation and flexibility	Apply at 400-500 microns per coat	Apply directly to manually, mechanically or hydroblasted prepared surfaces	Usable life 30 mins	White	
	Brush, roller or standard airless spray applied	Apply to surface primed with 501 CRSG or 506 Aluprime	Minimum over coating 30 mins	Light Grey	
			Maximum over coating Indefinite	(Can be tinted to BS/ RAL colours)	

Resimac Corrosion Protection Product Range

BS EN ISO 12944 Classification of Resimac Products

Corrosive Category	Examples of typical environments in rural, industrial & marine climates	
	Exterior	Interior
C1 VERY LOW	Not applicable	Heated buildings with a clean atmosphere, for example, shops, schools, hotels
C2 LOW	Atmospheres with low level of pollution. Mostly rural areas	Unheated buildings where condensation may occur, for example, depots, warehouses, sports halls
C3 MEDIUM	Urban and Industrial atmospheres, moderate sulphur dioxide pollution, areas with low salinity.	Production rooms with high humidity and some air pollution, for example, breweries, food production
C4 HIGH	Industrial areas and Coastal area with moderate salinity	Rooms and areas with high humidity, low risk of chemical vapour and splash, for example, swimming pools, chemical production
C5-I VERY HIGH (INDUSTRIAL)	Industrial areas with high humidity and aggressive atmosphere	Buildings and areas with almost permanent condensation and with high pollution
C5-M VERY HIGH (MARINE)	Coastal and offshore areas with high salinity	Buildings and areas with almost permanent condensation and with high pollution

C2 Low Corrosive Environment

<i>Low levels of pollution, rural areas</i>									
Surface Prep	Standard	Primer	No of Coats	DFT per coat (microns)	Top Coat	No of Coats	DFT per coat (microns)	Total DFT system	Expected Design Life to first maintenance
Manual	ST2	555 Resinox	1	350	555 Resinox	1	350	700	UP TO 5 YEARS

Abrasive Blast	SA 2.5	501 CRSG	1	350	508 UVPU	2	100	550	8-10 YEARS
Abrasive Blast	SA 2.5	501 CRSG	2	350	508 UVPU	2	100	550	12- 15 YEARS

Application of 530 H100 to hot surfaces ranging from 100°C to 240°C

Surface Prep	Surface temperature	Product	No of Coats	DFT per coat (microns)	Total DFT system	Expected Design Life to first maintenance
Manual	100°C - 150°C	530HA100	5	75	375	UP TO 3 YEARS
Manual	150°C - 200°C	530HA100	5	75	375	UP TO 2 YEARS
Manual	200°C - 240°C	530HA100	5	75	375	UP TO 1 YEAR
Mechanical	100°C - 150°C	530HA100	5	75	375	UP TO 3-5 YEARS
Mechanical	150°C - 200°C	530HA100	5	75	375	UP TO 3 YEARS
Mechanical	200°C - 240°C	530HA100	5	75	375	UP TO 2 YEARS
Hydroblast	100°C - 150°C	530HA100	5	75	375	UP TO 5 YEARS
Hydroblast	150°C - 200°C	530HA100	5	75	375	3-5 YEARS
Hydroblast	200°C - 240°C	530HA100	5	75	375	3 YEARS

The information outlined in the tables above and on the opposite page are for use as a general guide only. Please speak to your local Resimac representative or contact Resimac direct on admin@resimacme.com for more detailed information on our corrosion protection coatings.

Resichem 503 SPEP

Low viscosity primer for sealing concrete surfaces

a two component solvent free low viscosity epoxy primer designed to seal porous surfaces. The coating can be applied to cementitious surfaces with a moisture content of 8% or less.

- Solvent free epoxy technology
- Low viscosity penetrating primer
- Apply by brush, roller or standard airless spray
- Consolidates and seals porous surfaces
- Improves adhesion of epoxy or PU top coats
- Tolerant of less than ideal surface preparation
- Cures at low temperatures (5°C)
- Fast cure and extended working life grades available

Concrete surface primed using Resichem 503 SPEP prior to application of Resichem 501 CRSG

Concrete surface on a chemical containment area was mechanically abraded and sealed with Resichem 503 SPEP prior to being over coated with Resichem 501 CRSG

Resichem 505 Damp Seal

Primer for sealing concrete surfaces with a high moisture content, up to 25%

a two component solvent free epoxy primer designed to seal porous surfaces with excessive moisture content. The coating can be applied to cementitious surfaces with a moisture reading up to 25%.

- Solvent free epoxy technology
- Designed for damp surfaces
- Apply to concrete with high moisture content
- Seals and prevents further ingress of moisture
- Apply by brush, roller or standard airless spray
- Consolidates and seals porous surfaces
- Improves adhesion of epoxy or PU top coats
- Tolerant of less than ideal surface preparation

Concrete wall suffering from weather and UV degradation sealed with Resichem 505 Damp Seal

Concrete structure sealed with Resichem 505 Damp Seal prior to Resichem 501 CRSG being applied in 2 coats.

Resichem 501 CRSG

high build solvent free epoxy base coat for metallic & concrete surfaces

is a two component solvent free epoxy corrosion protection coating. The coating can be applied to mechanical, hydroblasted and abrasive blast cleaned surfaces.

- Solvent free epoxy technology
- Brush applied, roller or spray applied
- Apply at 300-500 microns WFT
- Compatible with acrylic and polyurethane top coats
- Excellent adhesion to metallic and primed concrete substrates
- Provides long term protection in C1-C5 corrosive environments

Bridge over UK rail line mechanically abraded and coated with 2 x coats of Resichem 501CRSG. Once cured Resichem 508 UVPU was applied to give a UV resistant finish

Badly corroded pipe surfaces were hydro-blasted at a European refinery and coated with 2 x coats of Resichem 501 CRSG to give long term protection against CUI

Resichem 501 CRSG

high build solvent free epoxy base coat for metallic & concrete surfaces

Structural steel underneath a water tank abrasive blast cleaned and coated with Resichem 501 CRSG

This material can be used to resurface and protect—

- **Bridges**
- **Stairways**
- **External tank surfaces**
- **Structural steel**
- **Machinery**
- **External pipe surfaces**
- **Transformers**
- **Steel containers**
- **Pump & Valve casings**

Diesel storage tank at a UK marina was badly corroded due to the corrosive environment. The external tank surfaces were mechanically abraded and protected using Resichem 501 CRSG.

Gantry crane in a chemical facility was mechanically abraded and coated with Resichem 501 CRSG

Resichem 506 Aluprime

thin film solvent based epoxy base coat for manual & mechanically prepared surfaces

is a two component solvent based low viscosity epoxy coating ideal for application to manual or mechanically prepared surfaces. The product can cure at temperatures as low as 5°C.

- Solvent based epoxy technology
- Brush, roller or spray applied
- Cures at low temperatures
- Compatible with acrylic and polyurethane top coats
- Tolerant of less than ideal surface preparation
- Provides long term protection in C1-C5 corrosive environments

This material can be used to resurface and protect—

- Bridges
- Stairways
- External tank surfaces
- Structural steel
- Machinery
- External pipe surfaces
- Transformers
- Steel containers
- Pump & Valve casings

Process Pipes at a chemical site required protection from external corrosion. All surfaces were mechanically abraded and coated with 506 Aluprime and 508 UVPU top coat

External pipe surfaces at a waste water treatment plant had become badly corroded. The surfaces of the pipes were mechanically abraded and protected with 2 x coats of 506 Aluprime

Resichem 554 RB Membrane *solvent based rubberised acrylic top coat, UV Stable*

is a single component solvent based rubberised acrylic top coat. The coating can be applied to primed metallic and concrete surfaces.

- Solvent based rubberised acrylic technology
- Single component
- Apply by brush or roller
- Cures at low temperatures (5°C)
- Flexible with excellent elongation
- Shower resistant after 15 minutes
- UV stable
- Provides long term protection in C1-C4 corrosive environments

This material can be used to resurface and protect—

- Bridges
- Stairways
- External tank surfaces
- Structural steel

Floating roof on crude oil tank hydro blasted at 1000psi, primed using 506 Aluprime and over coated with 554 RB membrane

Resichem 555 Resinox

water based acrylic membrane top coat, UV Stable

is a single component water based acrylic top coat. The coating can be applied to manually, mechanically, hydro-blasted and abrasive cleaned surfaces to provide long term corrosion protection

- **Water based acrylic technology**
- **Single component**
- **Apply by brush, roller or standard airless spray**
- **Flexible with excellent elongation**
- **Touch dry in 60 minutes at 20°C**
- **Tolerant of less than ideal surface preparation**
- **No primer required on metallic surfaces**
- **UV stable**
- **Provides long term protection in C1-C4 corrosive environments**

Petrol storage tank at European refinery hydroblasted and coated with 2 x coats of Resichem 555 Resinox

Large crane at fertiliser plant required a long term corrosion protection system. All surfaces were mechanically abraded and coated with 2 x coats of Resichem 55 Resinox

Resichem 555 Resinox

water based acrylic membrane top coat, UV Stable

Crude oil storage tank roof was cleaned with high pressure water at 1000psi. Resichem 555 Resinox was applied in 2 coats at 500 microns wet film thickness per coat.

This material can be used to resurface and protect—

- **Bridges**
- **Stairways**
- **External tank surfaces**
- **Structural steel**
- **Containers**
- **Transformers**
- **Pylons**

As part of a large coating contract 8 crude oil storage tanks were coated at a European oil refinery with Resichem 555 Resinox

Resichem 508 UVPU

solvent based polyurethane top coat, UV Stable

is a two component solvent based low viscosity polyurethane top coat for primed metallic and concrete surfaces. Resichem 508 UVPU is proven to offer long term asset protection with excellent UV stability.

- Solvent based polyurethane technology
- Two component
- Apply by brush, roller or standard airless spray
- Excellent flexibility once cured
- Apply to metallic surfaces primed with 506 Aluprime or 501 CRSG
- Apply to concrete surfaces primed with 503 SPEP and 505 Damp Seal
- UV stable
- Provides long term protection in C1-C5 corrosive environments
- Available in a wide range of RAL or BS colours

Training facility in the UK was refurbished using Resimac corrosion protection systems. All surfaces were mechanically abraded and primed with 506 Aluprime and top coated with 508 UVPU

Concrete surfaces of a subway were mechanically abraded, primed with 503 SPEP and top coated with 508 UVPU

Resichem 508 UVPU

solvent based polyurethane top coat, UV Stable

The external tank surfaces were mechanically abraded and primed using Resichem 501 CRSG, once cured a single coat of 508 UVPU was applied to give a UV stable finish to the tank surface

This material can be used to resurface and protect—

- **Bridges**
- **Stairways**
- **External tank surfaces**
- **Structural steel**
- **Machinery**
- **External pipe surfaces**
- **Transformers**
- **Steel containers**
- **Pump & Valve casings**

Grain silo required a 15 year + coating system to protect from further surface corrosion. The mechanically prepared surface was primed with 2 x coats of 506 Aluprime and top coated with 2 x coats of 508 UVPU

Resichem 530 HA100

Single component heat activated epoxy novolac for process surfaces ranging from 100°C-240°C

a single component heat activated epoxy novolac coating that has been designed to be applied to process surfaces ranging from 100°C-240°C. The product offers outstanding corrosion protection even to metallic surfaces with less than ideal surface preparation

- Solvent free epoxy novolac technology
- Fast curing at elevated temperatures
- Apply to surfaces ranging from 100°C-240°C
- Apply by brush, roller or standard airless spray
- No primer required on metallic surfaces
- Provides long term protection in C1-C5 corrosive environments

This material can be used to resurface and protect—

- Pipes
- Process equipment
- Valve and pump casings
- External tank surfaces

Nozzle on a hydrochloric acid storage tank operating at 115°C was rebuilt using 107 Metal Repair Paste XL and protected using 530H100

Resichem 530 HA100 applied to hot process pipes operating at 150-160°C using standard airless spray

Corrosion Protection Product Testing and Characteristics

	501	503	505	506	508	554	555	530

Resimac Technical Support and Expertise

Formed in 2009 and based in the North of England, Resimac manufactures a wide range of solvent free epoxy and polyurethane coatings and engineering materials for the Marine, Chemical, Water, Power, Oil and Gas Industries.

Our work force has over 120 years experience in the coatings industry and we are able to offer expert technical advice onsite or online 24 hours a day, 7 days a week.

Contact us direct by email, telephone or by visiting our website.
